## SECTION D – CREMATION RIGHTS AND RESPONSIBILITIES

The **Authorizing Agent(s)** have carefully read and understand the following statements before signing and completing this authorization:

- (1) The crematory authority shall not accept the Declarant/Deceased for cremation until: (1) all necessary authorizations have been obtained; (2) the Commonwealth of Kentucky has performed all prerequisites regarding the death; and, (3) any required forms or permits are attached.
- (2) All cremations are performed individually, unless the cremation is of a fetus. With the exception of fetuses, it is unlawful to cremate the remains of more than one individual within the same cremation chamber at the same time.
- (3) The Declarant or Authorizing Agent(s) may choose cremation without choosing embalming services. If the crematory authority does not have a refrigerated holding facility, it shall not accept human remains for anything other than immediate cremation.
- (4) The Declarant or Authorizing Agent(s) is not required to purchase a casket for the purpose of cremation. The crematory authority requires that the body of the Declarant/Decedent be delivered for cremation in a suitable, closed container. The container shall be either a casket or an alternative cremation container, but the crematory authority shall not require that the body be placed in a casket before cremation or that the body be cremated in a casket, nor shall a crematory authority refuse to accept human remains for cremation because they are not in a casket. The container in which the body is delivered to the crematory for cremation shall:
  - a. be composed of readily combustible materials suitable for cremation;
  - b. be able to be closed to provide a complete covering for the human remains;
  - c. be resistant to leakage or spillage; and,
  - d. be rigid enough to support the weight of the declarant or decedent.

The crematory authority may inspect the casket or alternative container, including opening it if necessary. The crematory authority shall not accept for holding a cremation container from which there is any evidence of leakage of the body fluids from the human remains in the container. Type of casket or alternative container selected

- 
- (5) Due to the nature of the cremation process, any personal possessions or valuable materials, such as dental gold or jewelry (as well as any body prostheses or dental bridgework), that are left with the decedent and not removed from the casket or container prior to cremation shall be destroyed and not be recoverable (unless the Declarant or authorized agent(s) grants authority, in writing, to the crematory authority to specifically recover materials). A crematory authority usually does not open a casket or container to allow for final viewing, remove valuables, or for other reasons. The authorizing agent(s) understands that arrangements must be made to remove any possessions or valuables prior to the time the declarant or decedent is transported to the crematory authority.
  - (6) Pacemakers, radioactive, silicon or other implants, mechanical devices or prosthesis may create a hazardous condition when placed in a cremation chamber and subjected to heat. The following list describes all devices (including mechanical, prosthetic, implants or materials) which have, or may have been, implanted in or attached to the declared/deceased: \_\_\_\_\_

The Declarant or Authorizing Agent(s) hereby authorizes the crematory authority or funeral home to remove all devices that may become hazardous during the cremation process.

- (7) Cremated remains shall not be contaminated (to the extent possible) with foreign material. All non-combustible materials (insofar as possible), such as dental bridgework, and materials from the casket or alternative container, such as hinges, latches, nails, etc., shall be separated and removed (to the extent possible) by visible or magnetic selection and shall be disposed of by the crematory authority with similar materials from other cremations in a non-recoverable manner, including through recycling of non-organic materials, so that only human bone fragments and organic ash, including both human remains and container remains, remain unless those objects are used for identification or as may be requested by the authorizing agent(s). Since cremated human remains often contain

recognizable bone fragments, any such fragments shall be mechanically processed or pulverized, which includes crushing or grinding into granulated particles of unidentifiable dimensions, virtually unrecognizable as human remains, prior to placement into the designated container, unless otherwise directed. While every effort will be made to prevent commingling, inadvertent or incidental commingling of minute particles of cremated remains from the residue of previous cremations is a possibility, and the Declarant or Authorizing Agent(s) understands and accepts these facts.

## SECTION E – FINAL DISPOSITION INSTRUCTIONS
