WORRY FREE Guarantee Marantee

10-STEP ID PROCESS

- 1 Our "wrist identification band" is placed on your loved one when we come to your home, hospital or other care facility.
- 2 The cremation container is labeled with your loved one's name when they are placed into our secure controlled temperature facility.
- 3 Your loved one is registered into our facility logbook with name, date, time, and driver's name.
- 4 Cremation permits are reviewed to ensure they have been properly filed and received prior to scheduling the cremation.
- 5 For a nominal fee, our state-of-the-art cremation facility allows family members to be present when the body is placed into the cremation chamber. The certified crematory operator is the acting witness for all cremations.
- 6 Your loved one is removed from our controlled temperature facility and noted in our facility logbook. The log shows the date and time of removal for cremation and the crematory operator's name.
- 7 Our crematory checklist contains the date, start time, and signature of the operator immediately before the cremation takes place.
- 8 The crematory checklist is placed on the control panel of the cremation chamber during the cremation process and at the same time a numbered metal identification disc is placed inside the cremation chamber.
- 9 After cremation, the cremated human remains with identification disc are removed from the chamber and taken to the processing station and allowed to cool. The crematory checklist and numbered identification disc are placed on the processing station until the cremated human remains are processed.
- 10 The number on the numbered identification disc and the cremation checklist are reviewed and matched. A cremation certificate and label are created prior to the placement of the cremated remains in the urn selected by the family.

Cremation Plus

Funeral then Cremation

\$4,360

- Transportation of the body within 30 miles of our facility
- Preparation of the required documents

"Just a Simple Cremation"

\$1,449

- C Transportation of the body within 30 miles of our facility
- C Preparation of the required documents
- Worry-Free Cremation™ in our crematory
- C Alternative cremation & temporary containers

*In our Simple Cremation with Final Goodbye there is no embalming and only a very limited time that the deceased may be transferred out of refrigeration and identified (refrigeration or embalming are required by state law 48 hours after death). So that the deceased remains in an essentially refrigerated state, we respectfully request that the identification be for no more than **30 minutes** from the time we agree to begin. In the interest of full disclosure while minimizing movement of the deceased, the identification occurs in the container that will shelter the deceased prior to cremation and will be later consumed in the cremation process. This scheduled Goodbye should take place during normal weekday business hours. In the case of Autopsied remains, embalming is necessary (additional fees).
